

OREGON HEALTH EDUCATION STANDARDS AND PERFORMANCE INDICATORS

Grades K-12

The mission of the Oregon Department of Education is to foster equity and excellence for every learner through collaboration with educators, partners and communities.

Oregon Department of Education (ODE) wishes to thank all the statewide stakeholders who provided input to develop the new Oregon Health Education Standards and Performance Indicators.

*Note, a significant change to the new standards includes K-12 grade level performance indicators.

Health Education Standards help define the knowledge and skills students will need throughout their K-12 experience. Standards also provide consistency in what is taught to students across our state to ensure equity in education.

Quality health education is characterized by standards-based instruction and provides students with the knowledge and skills needed to lead healthy lives.

Health-literate people are able to obtain and apply knowledge and skills to enhance their own health and the health of others — both now and in the future as their needs change throughout their lives.

ODE is in the process of developing guidance documents to assist districts with implementation of the new standards, and will be conducting an instructional materials review process in the summer of 2017.

Districts should be implementing instructional materials aligned to the new standards in the fall of 2018.
